Hourly Curves out 25 Years

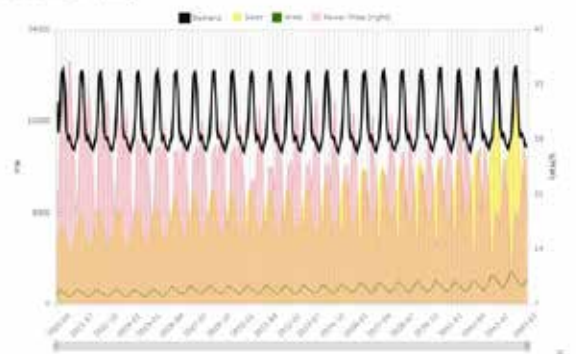

Custom curves available using your assumptions

SCE - Power Price - HL - Monthly

SP15 - HL - Monthly

All price drivers included (demand, wind, solar, hydro, transmission, fuel costs)

USERS OF CURVES

Power Data

- Value the WECC generating assets using hourly curves
- Utility-level forecasts, over 50 locations
- Incorporates forward-looking assumptions for:
 - Solar and Wind - wholesale
 - Solar - distributed generation
 - Electric Vehicles
 - Retirements

IRP

- Model Calibration - compare our forecasts to yours, find the key deltas
- Source of Inputs - fuel prices, hydro forecasts, all inputs that drive price
- Scenarios:
 - Impact of Green New Deal on your utility
 - Coal retirements
 - Remove the Lower Snake hydro projects

Stress Tests

Test any scenario
Plan accordingly
You drive the assumptions
